ABOUT US

Touch Inspiration is a team of passionate Web and Mobile application developers and designers who have led software development efforts for both startups and established brands. We've built and continue to build blockchain based software, agri-centric software, payment solutions, appointment solutions, property management software and more for Web, iOS and Android as well as progressive app development.

I often have people come up to me with a software-based idea or inspiration; whether to build an app from the ground up or to leveraging existing software to improve their current business processes.

The fundamental concept behind establishing this company is to allow people to touch their inspiration by turning their Ideas into fully functional software. This the name, Touch Inspiration.

– Robert M. Kamunyori, CEO
